# ILLINOIS CROP REPORT

FOR

May 1, 1915

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE  
AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, May 1, 1915.

The information contained in this report was obtained from the reports of correspondents mailed to this department the first day of May.

The correspondents are, as a rule, representative farmers of extended experience who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-eight years, and their estimates for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred and fifty and are so distributed over the State as to fairly represent each locality.

The State covers an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

## WINTER WHEAT.

There were 1,751,162 acres seeded to winter wheat last fall.

Four per cent of this area was reported winter-killed or destroyed by floods or Hessian fly, leaving 1,688,748 acres for harvest.

The condition of the growing crop on May 1 was 95 per cent of normal, being 96 per cent in northern Illinois, 101 per cent in central Illinois and 89 per cent in southern Illinois.

Hessian fly is reported from Champaign, Edgar, Jersey, Montgomery, Moultrie, Alexander, Edwards, Jasper, Lawrence, Marion, St. Clair, Union and Washington counties.

Chinchbugs are reported from Christian, Jersey, Macoupin, Montgomery, Morgan, Sangamon, Scott, Randolph, Richland, St. Clair and White counties.

Rain was much needed in many counties of the State on May 1st.

## SPRING WHEAT.

A decrease of 5 per cent is reported in the area seeded to spring wheat this year and the May 1 condition is reported as 94 per cent of normal.

## OLD WHEAT.

Of the 20,768,310 bushels of wheat raised in Illinois last year, it is estimated that there was on May 1, 1,080,491 bushels or about 5 per cent in the producers' hands.

Northern Illinois reports 7 per cent in first hands, central Illinois 3 per cent and southern Illinois 8 per cent.

416856

## CROP REPORT.

The following table gives the amount of old wheat in first hands May 1, since and including 1880:

Year produced.	Crop in bushels.	Per cent crop on hand following May 1.	Amount crop in producers' hands following May 1.	Surplus wheat above seed and consumption at harvest.	Deficit at harvest.
1880.....	56,508,309	15	8,476,246	39,851,883	.....

## WINTER RYE.

There were 140,393 acres seeded to winter rye last fall. A little over 1 per cent of this area was reported winter-killed or otherwise destroyed, leaving 138,426 acres for harvest.

The May 1 condition of this crop was 93 per cent of normal in northern Illinois, 100 per cent in central Illinois and 95 per cent in the southern division of the State.

## OATS.

There is a decrease of 4 per cent in the area seeded to oats for the 1915 crop as compared with last year.

The May 1 condition of oats was 91 per cent of normal in northern Illinois, 98 per cent in central Illinois, 80 per cent in southern Illinois, a State average of 90 per cent.

## BARLEY.

A decrease of 3 per cent is reported in the area of barley as compared with 1914, and its May 1 condition is 96 per cent of normal.

## OLD CORN.

The Illinois corn crop of 1914 was reported as 197,710,927 bushels. Of this amount, nearly 25 per cent, or 48,555,022 bushels, is reported in the producers' hands on May 1.

Champaign county produced the largest corn crop of any county in the State in 1914, that of 11,248,843 bushels.

The following table gives the amount of old corn in the producers' hands May 1, the past thirty-six years, as well as the extent of the crop produced each year:

Year produced.	Crop.	Per cent corn on hand following May 1.	Bushels corn in producers' hands following May 1.

1914.....	197,710,927	25	48,555,022
Average.....	233,640,463	29	68,492,843

## MEADOWS.

There is a decrease of 5 per cent in the area of meadows as compared with 1914.

Meadows were damaged considerably by the drought of 1914 and have made rather a slow growth this spring, there being but little rainfall during April.

Their May 1 condition was 78 per cent of normal in northern Illinois, 89 per cent in central Illinois and 85 per cent in the southern division of the State.

## PASTURES.

The area devoted to pastures is 96 per cent as compared with 1914.

The May 1 condition of pastures is 85 per cent of normal, their growth during April being cut short by lack of rain.

## CROP REPORT.

## SPRING PLOWING.

More than the usual amount of spring work was completed this year by May 1, 87 per cent being reported.

The condition of the soil is reported as mellow and easily worked.

---

LIVE STOCK.

## HORSES.

The number of horses reported May 1 is 95 per cent as compared with 1914, and their May 1 condition is 94 per cent of normal.

Distemper is reported from Bureau, Putnam, Stephenson, Champaign, Douglas, McDonough, Menard, Montgomery, Tazewell, Vermilion, Bond, Gallatin and St. Clair counties.

## MULES.

The number of mules reported May 1 is 97 per cent as compared with last year, and their May 1 condition is 96 per cent of normal.

## CATTLE.

The number of cattle reported May 1 is 89 per cent as compared with 1914, and their May 1 condition is 95 per cent of normal.

## DAIRY COWS.

The number of dairy cows is reported as 97 per cent as compared with last year, and their May 1 condition is 96 per cent of normal.

## HOGS.

The number of hogs on hand May 1 is reported as 86 per cent as compared with 1914, and their May 1 condition is 94 per cent of normal.

Hog cholera is reported from Stark, Adams, Fulton, Jersey, Menard, Pike, Schuyler and Tazewell counties.

## SHEEP.

The number of sheep reported is 87 per cent as compared with 1914, and their May 1 condition is 96 per cent of normal.

## FRUIT.

The fruit prospect on May 1 is most favorable. With the exception of peaches, the outlook is good for a full crop of fruit.

## WAGES PAID FARM HANDS.

Plenty of farm hands were available for the spring work of 1915, the supply being but 3 per cent short of the demand. The wages paid them are about the same as last year.

The average wages paid farm hands for the past thirty-six years is given in the following table:

Division.	Per day.		Per month.	
	With board.	Without board.	With board.	Without board.
Northern.....	\$1 15	\$1 45	\$22 60	\$30 70
Central.....	95	1 25	20 05	26 65
Southern.....	75	1 00	16 45	22 75
Average.....	\$0 95	\$1 25	\$19 70	\$26 70

The wages paid farm help in the three divisions of the State, during the past thirty-six years are given in the following tables:

## NORTHERN DIVISION.

Year.	Per day.		Per month.	
	With board.	Without board.	With board.	Without board.
1880.....	\$0 95	\$1 15	\$17 55	\$25 25

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimate of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not intended that these reports will exactly coincide with the official assessor's returns, but they do represent the condition or yield of the various crops, etc., at the date given, as estimated by men experienced in this work, and their estimates for a term of years will be found to closely approximate the assessor's returns.

B. M. DAVISON, Secretary.

# ILLINOIS CROP REPORT

FOR

JUNE 20, 1915

---

## Synopsis of the Reports of Correspondents Upon the Acreage and Yield of Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE  
Springfield, June 20, 1915.

The information contained in this report was obtained from the reports of correspondents mailed to this office the twentieth of June.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-eight years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred and fifty, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### CORN.

A slight increase in the area planted to corn for the 1915 crop is reported. In the Northern and Southern Divisions of the State, the area is 101 per cent as compared with last year, and 100 per cent in Central Illinois.

The June 20th condition of corn is 81 per cent of normal in Northern and Southern Illinois, and 89 per cent in Central Illinois, a State average of 84 per cent.

Corn has made slow growth owing to cool weather and excessive rainfall.

The quality of seed corn was reported as 97 per cent of normal.

Several counties in the Northern Division report damage to corn from cut, wire and grub worms and a dozen counties in the State report a few chinchbugs still with them.

Menard County reports the earliest appearance of corn above ground, April 1st.

### BROOM CORN.

The area of broom corn is 89 per cent as compared with 1914, and the June 20th condition 85 per cent of normal.

### SORGHUM.

The area of sorghum is reported as 97 per cent as compared with last year, and its condition on June 20th, 86 per cent of normal.

### WINTER WHEAT.

The June 20th condition of winter wheat in Northern Illinois was 100 per cent of normal, in Central Illinois 95 per cent, in Southern Illinois 76 per cent, a State average of 90 per cent.

## CROP REPORT.

Hessian fly is reported from nearly every county in the Central and Southern Divisions of the State.

## SPRING WHEAT.

A decrease of 5 per cent is reported in the area seeded to spring wheat this year, and the June 20th condition is 85 per cent of normal.

## OATS.

The condition of oats on June 20th was the best in years, 99 per cent of normal, which is 38 points better than the June 20th condition of 1914.

In Northern Illinois the condition of oats on June 20 was 99 per cent of normal, in Central Illinois 102 per cent and in Southern Illinois 96 per cent.

## RYE.

The condition of rye on June 20th was 94 per cent of normal, being 96 per cent in Northern Illinois, 97 per cent in Central Illinois and 89 per cent in the Southern Division of the State.

## BARLEY.

The June 20th condition of this crop was 96 per cent of normal in Northern Illinois, 97 per cent in Central Illinois and 84 per cent in the Southern Division of the State.

## MEADOWS.

There is a decrease of 5 per cent in the area of meadows as compared with 1914.

The June 20th condition was 90 per cent of normal, which is 26 points better than their condition of a year ago. Northern Illinois reports the condition of meadows as 85 per cent, Central and Southern Illinois as 93 per cent of normal.

## CLOVER.

There is a decrease of 9 per cent reported in the area of clover.

Northern Illinois reports the June 20th condition as 91 per cent of normal, Central Illinois 94 per cent and Southern Illinois 90 per cent.

## ALFALFA.

The condition of alfalfa in Northern Illinois on June 20th was 100 per cent of normal, in Central Illinois 98 per cent and in Southern Illinois 97 per cent.

## HUNGARIAN AND MILLET.

In Northern and Central Illinois the area of this crop is 100 per cent as compared with last year, and 90 per cent in the Southern Division of the State.

## PASTURES.

The area of pastures is 96 per cent as compared with 1914.

Pastures are reported in fine shape, their June 20th condition being 96 per cent of normal, which is 25 points better than their condition on the same date last year.

## IRISH POTATOES.

The area of Irish potatoes is 100 per cent as compared with 1914, and their June 20th condition is 102 per cent of normal.

## SWEET POTATOES.

There is a decrease of 3 per cent in the area of sweet potatoes as compared with last year, and their condition on June 20th is 96 per cent of normal.

## FIELD BEANS.

There is an increase of 1 per cent reported in the area of field beans this year.

In Northern Illinois their June 20th condition was 97 per cent of normal, in Central Illinois 95 per cent and in Southern Illinois 92 per cent.

## COW PEAS.

The area of cow peas is 97 per cent as compared with last year in Northern Illinois, 102 per cent in Central Illinois, and 96 per cent in the Southern Division of the State.

## TOBACCO.

But very little tobacco is raised in Illinois—only one county, JoDaviess, reporting on this crop in the Northern Division. No reports were received from Central Illinois. In Southern Illinois the area is 99 per cent as compared with 1914, and the June 20th condition 95 per cent of normal.

## FRUIT.

According to the reports of our correspondents on June 20th, the prospect is most encouraging for a big yield of apples, but the peach crop will be light.

The condition of small fruit is reported good and the yield as follows:

## CHERRIES.

In Northern Illinois the yield of cherries was 93 per cent of a seasonable average, in Central Illinois 86 per cent and in Southern Illinois 108 per cent.

## STRAWBERRIES.

The yield of strawberries in Northern Illinois was 96 per cent of a seasonable average, 92 per cent in Central Illinois and 85 per cent in the Southern Division of the State.

## RASPBERRIES.

The yield of raspberries in Northern Illinois was 90 per cent of a seasonable average, 91 per cent in Central Illinois and 92 per cent in Southern Illinois.

## GOOSEBERRIES.

In Northern Illinois the yield of gooseberries was 89 per cent of a seasonable average and 92 per cent in both the Central and Southern Divisions of the State.

## CURRANTS.

The yield of currants was 90 per cent of a seasonable average in Northern Illinois and 87 per cent in both the Central and Southern Divisions of the State.

## VINEYARDS.

The area of vineyards as compared with 1914 is 97 per cent in both the Northern and Central Divisions and 98 per cent in the Southern Division of the State.

The June 20th condition of vineyards is reported as 91 per cent of normal.

## YOUNG LIVE STOCK.

## PIGS.

The number of pigs reported this year is 91 per cent as compared with 1914, and their June 20th condition is 97 per cent of normal.

## LAMBS.

The number of lambs is 91 per cent as compared with last year, and their June 20th condition 98 per cent of normal.

## CALVES.

The number of calves reported this year is 98 per cent as compared with 1914, and their June 20th condition was 99 per cent of normal in Northern and Central Illinois and 98 per cent in the Southern Division of the State.

## COLTS.

The number of colts foaled this year as compared with 1914 is 93 per cent, and their June 20th condition is 97 per cent of normal.

The average value of colts at weaning time is reported as \$50 in Northern Illinois, \$52 in Central Illinois and \$53 in the Southern Division of the State.

The number of colts lost prior to weaning is reported as 9 per cent in Northern Illinois and 7 per cent in the Central and Southern Divisions of the State.

The average cost of service of stallions in Northern Illinois is reported as \$15, in Central Illinois \$13 and in Southern Illinois \$11.

## WOOL.

The wool clip of 1915 was 92 per cent as compared with 1914 in Northern Illinois, 90 per cent in Central Illinois and 93 per cent in the Southern Division of the State.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimate of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessor's returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimate for a term of years will be found to closely approximate the assessors' returns.

B. M. DAVISON,  
Secretary.

# ILLINOIS CROP REPORT

FOR

AUGUST 1, 1915

---

## Synopsis of the Reports of Correspondents Upon the Acreage and Yield of Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, August 1, 1915.

The information contained in this report was obtained from the reports of correspondents mailed to this office the first of August.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

The reports of our correspondents as to acreage of the crops, after being carefully edited in this Department, were used as a basis for applying the estimates as to the growing condition or yield of the harvested crop.

The correspondents number three hundred and fifty and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### WHEAT.

The area seeded to wheat for the 1915 crop was 2,020,675 acres, all of which was winter wheat, with the exception of 42,482 acres.

Eight per cent of the winter wheat area was winter-killed, or destroyed by floods, or Hessian fly, leaving 1,871,658 acres of wheat (spring and winter) for harvest.

The average yield per acre was 29 bushels in northern Illinois, 23 bushels in central Illinois and 14 bushels in southern Illinois, a State average of 19 bushels, the total yield amounting to 35,752,952 bushels.

The ruling price of wheat on August 1 was \$1.00 per bushel, the total value of the crop at this price amounting to \$35,727,193.

The following table gives the area, yield and value of the wheat crop of the State during the past fifty-five years:

## WHEAT (SPRING AND WINTER).

Year.	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## WHEAT CONSUMPTION.

In estimating the amount of wheat required in the State for seed and bread, it is necessary to consider the entire area seeded, instead of that harvested, as the amount required for seed is based on the area seeded last year, which was 2,020,675 acres. As one and one-third bushels per acre is used for seed, it will require 2,694,231 bushels to seed next year's crop.

Allowing four bushels per capita for food, it takes, according to the 1910 census, which gives Illinois 5,638,591 inhabitants, 22,554,364 bushels for that purpose; so that 25,248,595 bushels will be required for home use (seed and consumption).

As the total yield amounted to 35,752,952 bushels, there remain 10,504,357 bushels for shipment.

## OATS.

The area seeded to oats for 1915 was reported as 4,922,027 acres, of which 2,071,163 acres were reported from northern Illinois, 1,980,860 acres from central Illinois and 870,004 acres from southern Illinois.

In northern Illinois the yield was 47 bushels per acre, in central Illinois 45 bushels, and in southern Illinois 32 bushels, a State average of 44 bushels.

The total yield amounted to 216,385,726 bushels and the value of the crop at the average price of 37 cents per bushel amounted to \$79,722,556.

Oats harvest was delayed on account of rain and some oats reported growing in shock.

The following table gives the area, yield and value of the oats crop of the State during the past fifty-five years:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of the oats crop in each county in the State this year.

## WINTER RYE.

There are 171,674 acres of winter rye reported this year.

The average yield per acre was 17 bushels, and the total yield amounted to 2,936,804 bushels.

The average price on August 1 was 87 cents per bushel and the total value of the crop amounted to \$2,560,370.

The following table gives the area, yield and value of the past fifty-five rye crops grown in the State.

Year.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of rye in each county in the State.

## BARLEY.

There are 44,963 acres of barley reported this year. The average yield per acre was 25 bushels and the total yield amounted to 1,146,289 bushels.

The ruling price on August 1 was 73 cents per bushel and the total value of the crop amounted to \$833,760.

The following table gives the area, yield and value of the last fifty-five barley crops produced in the State:

Year.	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

In a table published elsewhere in this report will be found the area, yield and value of the barley crop in the State by counties.

## HAY.

The area devoted to meadows is reported as 4,506,957 acres. Northern Illinois reports 1,516,818 acres, central Illinois 1,767,498 acres and southern Illinois 1,222,641 acres.

The average yield per acre, 1 1-2 tons is above the average yield for the past six years and the total yield amounted to 6,888,057 tons.

The average price per ton on August 1 was \$11.10 and the total value of the crop amounted to \$76,309,678.

The August 1 condition of clover was 90 per cent of normal and the average yield 1 2-3 ton per acre.

The following table gives the area, yield and value of the last fifty-five hay crops produced in this State:

Year.	Number of acres harvested.	Average yield per acre—tons.	Tons produced.	Price per ton.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## CORN.

There were 8,976,842 acres planted to corn for the crop of 1915, northern Illinois reporting 3,635,430 acres, central Illinois 3,952,440 acres and southern Illinois 1,388,972 acres.

Corn on lowlands has been practically drowned out.

Excessive rains and cool weather have retarded the growth of corn, but the August 1 condition, 85 per cent of normal, is 24 points better than the condition of a year ago.

The August 1 condition of corn is reported as 84 per cent of normal in northern Illinois, 93 per cent in central Illinois and 77 per cent in the southern division of the State.

## BROOM-CORN.

The condition of broom-corn on August 1 was 86 per cent of normal in northern Illinois, 90 per cent in central Illinois and 81 per cent in the southern division of the State.

## SORGHUM.

The condition of sorghum on August 1 was 87 per cent of normal in northern Illinois, 96 per cent in central Illinois and 81 per cent in the southern division of the State.

## PASTURES.

The area devoted to pastures is reported as 7,296,050 acres. Northern Illinois reports 2,796,358 acres, central Illinois 2,399,725 acres and southern Illinois 2,099,967 acres.

Pastures are reported in excellent condition on August 1, the State average being 101 per cent of normal, which is 58 points better than their condition of a year ago.

## IRISH POTATOES.

The August 1 condition of Irish potatoes was 103 per cent of normal in northern Illinois and 100 per cent in both the central and southern divisions of the State.

## SWEET POTATOES.

The condition of sweet potatoes in northern Illinois on August 1 was 100 per cent of normal, in central Illinois 94 per cent and in southern Illinois 92 per cent.

## BUCKWHEAT.

The area of this crop is reported as 91 per cent as compared with 1914, and its August 1 condition was 99 per cent in northern Illinois, 87 per cent in central Illinois and 93 per cent in the southern division of the State.

## TURNIPS AND OTHER ROOT CROPS.

The area of turnips and other root crops is 98 per cent as compared with 1914 and their August 1 condition was 99 per cent of normal.

## CASTOR BEANS.

The August 1 condition of this crop was 97 per cent of normal in northern Illinois, 85 per cent in central Illinois and 95 per cent in the southern division of the State.

## TOBACCO.

The condition of this crop on August 1 was 90 per cent of normal in northern Illinois, 73 per cent in central Illinois and 87 per cent in the southern division of the State.

## COW PEAS.

The August 1 condition of cow peas was 98 per cent of normal in northern Illinois, 86 per cent in central Illinois and 74 per cent in southern Illinois.

## CROP REPORT.

## FIELD BEANS.

The August 1 condition of field beans was 101 per cent of normal in northern Illinois, 87 per cent in central Illinois and 82 per cent in southern Illinois.

## FRUIT.

## APPLES.

The prospect for the apple crop is most favorable, the August 1 condition being 98 per cent in northern and central Illinois and 99 per cent in the southern division of the State.

## PEACHES.

The condition of peaches on August 1 was 59 per cent of normal in northern Illinois, 45 per cent in central Illinois and 61 per cent in southern Illinois.

## PEARS.

The August 1 condition of pears was 75 per cent of normal in northern Illinois, 71 per cent in central Illinois and 65 per cent in the southern division of the State.

## PLUMS.

The condition of plums on August 1 was 83 per cent of normal in northern Illinois, 81 per cent in central Illinois and 94 per cent in southern Illinois.

## GRAPES.

The August 1 condition of grapes was 91 per cent of normal in northern Illinois, 90 per cent in central Illinois and 94 per cent in the southern division of the State.

## BLACKBERRIES.

The blackberry crop of 1915 was 97 per cent of an average yield in northern Illinois, 71 per cent in central Illinois and 84 per cent in southern Illinois.

## QUINCES.

The condition of quinces on August 1 was 80 per cent of normal in northern Illinois, 92 per cent in central Illinois and 77 per cent in the southern division of the State.

## LIVE STOCK.

Farm animals are reported in a healthy condition, with the exception of a few cases of hog cholera and distemper.

Hog cholera is reported from Stephenson, Brown, Cass, Douglas, Fulton, Hancock, Logan, Morgan, Pike, Sangamon, Schuyler, Scott and Fayette counties.

Distemper is reported from Douglas, Jersey, Macoupin and Union counties.

## DRAIN TILE.

The number of feet of drain tile reported in the State amounts to 753,937,301 feet, which gives an average of 25 feet to each acre of cultivated land in Illinois.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease

of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years will be found to closely approximate the assessors' returns.

B. M. DAVISON,  
Secretary.

#### NOTE.

The county clerks of the following counties, viz: DeKalb, DuPage, Kendall, Lake, Lee and McHenry furnished the tabulated schedules of their counties in accordance with the law, and computations for those counties are based on their reports.

# ILLINOIS CROP REPORT

## FOR

### DECEMBER 1, 1915

---

#### Synopsis of the Reports of Correspondents Upon the Acreage and Yield of Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, December 1, 1915.

The information contained in this report was obtained from the reports of correspondents mailed to this office the first of December.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

The reports of our correspondents as to acreage of the crops, after being carefully edited in this Department, were used as a basis for applying the estimates as to the growing condition or yield of the harvested crop.

The data in regard to yield per acre, price of crops and value of crops and live stock was obtained from crop correspondents, who number three hundred and fifty-eight and represent every section of the State.

A large number of the correspondents have been reporting to this Department for the past thirty-eight years, and their estimates, for a term of years, when compared with subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

#### WINTER GRAIN.

##### WHEAT.

The area reported seeded to winter wheat for the 1916 crop was 1,812,433 acres, or 8 per cent less than the 1915 wheat area.

Northern Illinois reports 139,360 acres, central Illinois 775,973 acres and southern Illinois 897,100 acres. The condition of winter wheat on December 1 was 92 per cent of normal in northern Illinois, 90 per cent in central Illinois and 89 per cent in the southern division of the State, a State average of 90 per cent.

Reports of Hessian fly having injured early sown wheat were received from Adams, Cass, Clark, Cumberland, Greene, Jersey, Macon, Morgan, Scott, Alexander, Clinton, Crawford, Edwards, Franklin, Gallatin, Hardin, Jackson, Lawrence, Madison, Marion, Monroe, Pope, Randolph, St. Clair, Washington and White counties.

##### RYE.

The area seeded to rye for the 1916 crop is reported as 165,775 acres, northern Illinois reporting 39,505 acres, central Illinois 64,036 acres and southern Illinois 62,234 acres.

The condition of rye on December 1 was 95 per cent of normal in northern and southern Illinois and 92 per cent in the central division.

## CORN.

The area in corn for the 1915 crop was reported as 8,966,842 acres.

Northern Illinois reported 3,635,430 acres, central Illinois 3,942,440 acres and southern Illinois 1,388,972 acres.

The yield per acre in northern Illinois was 36 bushels, in central Illinois 40 bushels and in southern Illinois 23 bushels, a State average of 36 bushels. The total yield amounted to 320,111,081 bushels.

The price of corn on December 1 was 55 cents per bushel in northern and southern Illinois and 53 cents in central Illinois, an average price of 54 cents. At this price the total value of the 1915 corn crop of the State amounted to \$173,026,637.

Corn was damaged greatly by a cold wet season and windstorms so that much corn is reported as soft and not fully matured. The quality of the grain was but 58 per cent of normal in northern Illinois, 90 per cent in central Illinois and 88 per cent in southern Illinois, a State average of 79 per cent.

## CROP REPORT.

5

The area, yield and value of the corn crop of the State for the past fifty-six years is given in the following table:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel—cents.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860...	3,839,159	30	115,174,770	42 <sup>3</sup> / <sub>4</sub>	\$ 48,944,277	\$12 74	\$10 50	\$40,311,169	\$ 8,633,108

## CROP REPORT.

## BROOM-CORN.

The area of broom-corn was reported as 34,201 acres.

The total yield amounted to 19,932,000 pounds, an average yield of 500 pounds.

The ruling price December 1 was \$129 per ton and the total value of the crop amounted to \$1,282,193.

The following table gives the area, yield and value of the broom-corn crop of Illinois since 1876:

Year.	Acreage.	Av. yield per acre— pounds.	Total yield— pounds.	Price per ton.	Value of crop.
1877.....	14,566	458	6,674,747	\$ 71 20	\$ 237,594

## CROP REPORT.

197  
4

## SORGHUM.

There were 17,364 acres of sorghum reported in 1915. The average yield per acre was 108 gallons and the total yield amounted to 1,874,151 gallons.

The ruling price on December 1 was 65 cents per gallon, the total value of the product amounting to \$1,189,306.

The following table gives the area, yield and value of the sorghum crops produced in the State since 1876:

Year.	Acreage.	Av. yield per acre— gallons.	Total number of gallons.	Price per gallon.	Value of crop.
1877.....	19,335	63	1,237,164	\$0 42	\$515,409

## CROP REPORT.

## BUCKWHEAT.

The area of buckwheat is reported as 4,228 acres.

The average yield per acre was 17 bushels and the total yield amounted to 73,585 bushels.

The total value of the crop amounted to \$74,150, an average price of \$1.00 per bushel.

The following table gives the area, yield and value of the buckwheat crop in this State for the past thirty-nine years:

Year.	Acreage.	Av. yield per acre— bushels.	Total number of bushels.	Price per bushel.	Value of crop.
1877.....	15,880	13	207,693	\$0 73	\$151,612

## TIMOTHY SEED.

There were 101,622 bushels of timothy seed reported produced in 1915.

At the average price per bushel of \$2.90, the total value of the crop amounted to \$296,278.

The following table gives the amount and value of the crop in this State since and including 1877:

Year.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	483,571	\$1 25	\$ 504,464
1878.....	261,559	1 25	326,949

## CROP REPORT.

## CLOVER SEED.

There were 40,300 bushels of clover seed reported produced in 1915.

The average price per bushel was \$9.35 and the total value of the crop amounted to \$377,544.

In the following table will be found the yield and value of the crop of clover seed for 1915, as compared with the thirty-eight years preceding:

Year.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	64,686	\$ 4 80	\$310,493
1878.....	77,388	4 05	313,421

## HUNGARIAN AND MILLET SEED.

There were 15,005 bushels of Hungarian and millet seed produced in 1915.

The total value of the crop amounted to \$13,370, an average price of 90 cents per bushel.

The following table gives the yield and value of this crop since 1876:

Year.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	17,463	\$0 65	\$10,701
1878.....	26,787	55	14,733

1915.....	15,005	90	13,370

## ALFALFA.

The area devoted to this crop is reported as 30,740 acres in northern Illinois, 33,720 acres in central Illinois and 16,875 acres in southern Illinois, a total of 81,335 acres.

The price of alfalfa is reported as \$14.85 per ton in northern Illinois, \$13.40 in central Illinois and \$12.85 in southern Illinois.

## BEANS.

There were 10,691 acres of beans reported in 1915. The average yield was 13 bushels per acre and the total yield amounted to 136,546 bushels.

The ruling price December 1 was \$3.30 per bushel and the total value of the crop amounted to \$447,999.

The following table gives the area, yield and value of the 1915 crop of beans, together with those of thirty-eight years preceding:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	1,545	13	19,955	\$1 50	\$ 29,916

## CASTOR BEANS.

There were but 800 acres reported in castor beans in 1915 and the average yield 17 bushels per acre, making the total yield 13,800 bushels.

The ruling price December 1 was \$1.10 per bushel and the total value of the crop amounted to \$15,000.

In the following table is given the area, yield and value of this crop since 1877:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	4,503	31	17,538	\$1 10	\$ 18,512

## TOBACCO.

The area devoted to tobacco in 1915 was reported as 2,604 acres. The average yield per acre was 572 pounds and the total yield amounted to 1,489,800 pounds.

The total value of the crop at the ruling price of 7 cents per pound on December 1, was \$111,510.

The following table gives the area, yield and value of the crop in this State since 1876:

Year.	Acreage.	Av. yield per acre— pounds.	Total number of pounds.	Price per pound.	Value of crop.
1877.....	12,230	640	7,885,586	\$0.08	\$638,848

## PASTURES.

The area devoted to pastures in 1915 was reported as 7,296.050 acres.

The average value per acre for the season of 1915 was \$5.10 and the total value amounted to \$37,104,726.

The following table gives the area and value of pastures for thirty-nine years:

Year.	Acreage.	Average value per acre for season.	Value of crop.
1877.....	4,367,603	\$3 38	\$14,764,112

## IRISH POTATOES.

The area devoted to Irish potatoes in 1915 was reported as 125,715 acres.

The average yield per acre was 116 bushels and the total yield amounted to 14,531,328 bushels.

The average price on December 1 was 60 cents per bushel and the total value of the crop amounted to \$8,474,268.

The following table gives the area, yield and value of the Irish potato crops of the State since 1859:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## CROP REPORT.

17

## SWEET POTATOES.

The area reported in sweet potatoes in 1915 was 16,499 acres.

The total yield amounted to 1,765,471 bushels, an average of 107 bushels per acre.

The average price per bushel was 85 cents and the total value of the crop amounted to \$1,533,625.

The following table gives the area, yield and value of the sweet potato crop of the State for the past thirty-nine years:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	2,355	63	148,270	\$0 85	\$126,092

## TURNIPS AND OTHER ROOT CROPS.

There were 2,513 acres reported in turnips and other root crops, and their total value amounted to \$130,737.

The average yield of turnips was 131 bushels per acre.

The following table gives the acreage and value of turnips and other root crops grown in the State during the past thirty-nine years:

Year.	Acreage.	Value per acre.	Value of crop.
1877.....	7,056	\$ 39 55	\$279,136
1878.....	3,775	40 85	154,140
1879.....	3,139	230 15	722,444

## FRUIT.

## APPLES.

A big crop of apples was reported this year, the yield being 207 per cent as compared with 1914.

The price obtained for winter apples on December 1 was reported as 60 cents per bushel.

## PEACHES.

But few peaches were raised in the State this year, the yield being but 51 per cent of normal.

The average price obtained for peaches in their season was reported as \$1.20.

## PEARS.

The yield of pears in 1915 was 101 per cent as compared with 1914. The average price of pears in their season was 90 cents per bushel.

## GRAPES.

There were 1,448,720 pounds of grapes reported produced in 1915.

The total value of the crop amounted to \$32,651, an average price of 2 cents per pound.

The following table gives particulars concerning the grape crop of the State for the past thirty-nine years.

Year.	Pounds produced.	Price per pound.	Value of crop.
1877.....	3,002,748	\$0 03	\$ 92,782

## CROP REPORT.

## WINE.

There were 60,100 gallons of wine reported produced in the State in 1915.

The total value of the product amounted to \$62,440, an average price of \$1.05 per gallon.

The following table gives the number of gallons of wine and the value thereof during the past thirty-nine years:

Year.	Number of gallons, produced.	Price per gallon.	Value of crop.
1877.....	158,944	\$1 20	\$191,933

## STRAWBERRIES.

The value of the strawberry crop of 1915 is reported as \$94,305, of which amount northern Illinois reports \$20,200, central Illinois, \$34,455, and southern Illinois, \$39,650.

## WATERMELONS.

Northern Illinois reports the value of watermelons sold in 1915 as \$7,416, central Illinois, \$7,000, southern Illinois \$9,250, a total value of \$23,666.

## OTHER FRUITS AND BERRIES.

The following table gives the acreage and value for the past thirty-nine years of other fruits and berries not named above:

Year.	Acreage.	Price per acre.	Value of crop.
1877.....	4,523	\$ 35 53	\$178,800
1878.....	2,569	55 51	197,581

## CROP REPORT.

## OTHER CROPS NOT NAMED.

There are a number of crops raised in this State which are cultivated only in limited localities, and are not of sufficient importance to be tabulated alone, but are of considerable value to producers.

The value of these miscellaneous crops for 1915 amounted to \$67,425.

## BEES AND HONEY.

There were 201,050 pounds of honey produced in Illinois in 1915.

The average price obtained was 18 cents per pound, making the total value \$35,459.

The number of hives of bees reported in 1915 was 46,561.

The following table gives the amount and value of honey produced in this State during the past twenty-five years, together with the number of hives of bees:

Year.	Pounds produced.	Price per pound.	Value of product.	Number of hives of bees.
1891.....	821,678	\$0 14	\$112,934	120,252

## LIVE STOCK.

## HOGS.

The number of hogs in the State May 1, 1915, is reported as 904,315. At the equalized value of \$2.28 per head, they were worth \$2,061,838.

The number marketed was 750,587 or 83 per cent of the whole number.

The average weight of those marketed was 205 pounds, giving a total gross weight of 153,881,331 pounds.

The average price per cwt. of hogs marketed was \$6.75, their value at this price being \$10,429,722.

The supply of hogs on hand December 1 was 89 per cent, and the average price per cwt. on that date \$6.20.

Hog cholera was reported prevalent in the central division of the State and northern and southern Illinois report a few cases.

The following table gives the number of hogs assessed and marketed in 1915, as well as their weight and value, for the past sixty years:

Year.	Assessors' returns.		Estimated per cent marketed.	Number fat hogs marketed.	Average gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value hogs marketed.
	Number.	Value.

## BEEF CATTLE.

The number of cattle in the State May 1, 1915, is reported as 1,007,308. At the equalized value of \$10.10 per head, they were worth \$10,173,811.

Twenty-three per cent of the whole, 231,678, were marketed during the year. The average weight was 1,042 pounds, making the total weight 241,320,681.

## CROP REPORT.

The average price of those sold prior to December 1 was \$7.35, a total value of \$17,741,267.

The supply of beef cattle on hand December 1, 1915, was 88 per cent and the average price per cwt. on that date \$7.05.

Blackleg was reported from Carroll, Knox, Rock Island, Warren, Greene, Schuyler and Shelby counties.

The following table gives the number, weight and value of the cattle marketed in the State since 1855:

Year.	Assessors' returns.		Estimated per cent marketed.	Number beef cattle marketed.	Average gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value beef cattle marketed.
	Number.	Value.

## HORSES.

The number of horses reported this year is 1,206,124, and their equalized value \$24.78, the total value amounting to \$29,887,753.

The number of colts reported foaled in 1914 was 48,785.

Distemper is reported from Iroquois, Kane, Knox, Logan, Schuyler, Edwards, Marion and White counties.

The following table gives the number of horses assessed in the State since 1855 and their equalized valuation, as well as the number of colts foaled each year since 1878:

Year.	Assessors' returns.		Number colts foaled.

#### SHEEP.

There were 226,993 sheep reported this year. At the equalized value of \$1.23 per head, they were worth \$279,201.

Twenty-two per cent of the whole, or 49,940, were marketed.

Their total gross weight was 5,189,231 pounds, an average weight of 104 pounds.

The average price received for those marketed prior to December 1, was \$6.05, making the total value \$315,064.

The supply of sheep on hand December 1 was 87 per cent. and the average price per cwt. \$6.25.

The following table gives the number, weight and value of the sheep marketed in the State since 1855:

Year.	Assessors' returns.		Estimated per cent marketed.	Number fat sheep marketed.	Average gross weight per head.	Total gross weight.	Value per 100 pounds gross.	Total value sheep marketed.
	Number.	Value.

## DAIRY PRODUCTS.

## MILK.

There were 96,269,589 gallons of milk sold in Illinois in 1915.

The average price was 19 cents per gallon and the total value amounted to \$18,446,643.

The following table gives the amount, price and value of the milk sold in the State for the past thirty-eight years:

Year.	Gallons sold.	Price per gallon.	Total value.
1877.....	\$ 17,124,506	\$0 11½	\$ 1,912,236

## CROP REPORT.

## CHEESE.

The number of pounds of cheese sold in the State in 1915 is reported as 582,946 pounds. The average price per pound was 19 cents and the total value amounted to \$108,475.

The following table shows the quantity and value of the cheese sold in the State since 1876:

Year.	Pounds sold.	Price per pound.	Total value.
1877.....	4,502,671	\$0 12	\$540,320
1878.....	5,139,914	10	513,691
1879.....	6,618,212	13	860,367
1880.....	6,186,680	13	803,398
1881.....	5,837,974	15	875,696
1882.....	5,252,036	14	734,285

1909.....	655,102	17	113,168
1910.....	678,927	18	123,458
1911.....	641,693	17	109,136
1912.....	619,220	19	120,394
1913.....	618,864	20	122,036
1914.....	579,817	19	111,654
1915.....	582,946	19	108,475

Tables published elsewhere in this report give by counties the quantity and value of the dairy products of the State for 1915.

## POULTRY AND EGGS.

The value of the poultry sold in 1915 amounted to \$2,252,818, of which \$1,016,467 is reported from northern Illinois, \$660,907 from central Illinois and \$575,444 from southern Illinois.

The value of eggs sold in northern Illinois in 1915 is reported as \$1,251,236, in central Illinois \$663,452, and \$1,095,570 in southern Illinois.

## SUMMARY.

The following table gives the value of the principal farm products and live stock of Illinois for the year 1915:

Corn .....	\$173,026,637
Winter wheat .....	34,846,752
Spring wheat .....	880,441
Oats .....	79,722,556
Rye .....	2,560,370
Barley .....	833,760
Buckwheat .....	74,150
Hay .....	76,309,678
Timothy seed .....	296,278
Clover seed .....	377,544
Hungarian and millet seed.....	13,370
Irish potatoes .....	8,474,268
Sweet potatoes .....	1,533,625
Turnips and other root crops.....	130,737
Broom-corn .....	1,282,193
Sorghum .....	1,189,306
Beans .....	447,999
Castor beans .....	15,000
Tobacco .....	111,510
Other crops not named.....	67,425
Grapes .....	32,651
Strawberries .....	94,305
Watermelons .....	23,666
Other fruits and berries.....	18,129
Wine .....	62,440
Honey .....	35,459
*Horses (equalized value).....	29,887,753
*Beef cattle (equalized value).....	10,173,811
Dairy cows .....	32,804,426
*Hogs (equalized value).....	2,061,838
*Sheep (equalized value).....	279,201
Wool .....	283,795
Milk sold .....	18,446,643
Cream sold .....	2,502,331
Butter sold .....	2,289,757
Cheese sold .....	108,475
Poultry sold .....	2,252,818
Eggs sold .....	3,010,258
Total .....	\$486,561,355

\*NOTE—The equalized value as fixed by the State Board of Equalization represents but one-fifth of the actual value.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season and immediately after harvest, when the information as to condition and yield is most needed, to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or 10 per cent, is recorded 110; a decrease of 5 per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

B. M. DAVISON, Secretary.

# ILLINOIS CROP REPORT

FOR

May 1, 1916

---

## Synopsis of the Reports of Correspondents Upon the Acreage and Yield of Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, May 1, 1916.

The information contained in this report was obtained from the reports of correspondents mailed to this department the first day of May.

The correspondents are, as a rule, representative farmers of extended experience who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-nine years, and their estimates for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred and fifty-seven and are so distributed over the State as to fairly represent each locality.

The State covers an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### WINTER WHEAT.

There were 1,812,433 acres reported seeded to winter wheat last fall.

Of this area 47 per cent was winter-killed, destroyed by floods or Hessian fly, or abandoned, leaving 955,220 acres, or 53 per cent of the area sown, for harvest.

In the northern division of the State 38 per cent of the area was reported destroyed or abandoned, in central Illinois 49 per cent and in southern Illinois 48 per cent.

The condition of the growing crop on May 1 was 68 per cent of normal, being 78 per cent in northern Illinois, 67 per cent in central Illinois and 61 per cent in the southern division of the State.

### SPRING WHEAT.

There is practically no spring wheat raised in central or southern Illinois.

In northern Illinois the area seeded to spring wheat this year is reported as 97 per cent as compared with 1915, and the May 1 condition as 94 per cent of normal.

### OLD WHEAT.

Of the 35,752,952 bushels of wheat raised in Illinois last year, it is estimated that there was on May 1, 3,480,188 bushels or about 10 per cent of the crop in the producers' hands.

Northern and central Illinois each report 9 per cent in first hands and southern Illinois 11 per cent.

## CROP REPORT.

The following table gives the amount of old wheat in first hands May 1, since and including 1880:

Year produced.	Crop in bushels.	Per cent crop on hand following May 1.	Amount crop in producers' hands following May 1.	Surplus wheat above seed and consumption at harvest.	Deficit at harvest.

Average.....	25,390,389	12	3,095,233	12,376,154	4,788,678

## WINTER RYE.

There were 165,775 acres reported seeded to rye last fall and the May 1 report shows 18 per cent of this area has been winter-killed, leaving 135,395 acres for harvest.

The May 1 condition of this crop was 90 per cent of normal in northern Illinois, 88 per cent in central Illinois, and 80 per cent in southern Illinois, a State average of 87 per cent.

## OATS.

There is an increase of 2 per cent in the area seeded to oats for the 1916 crop.

The May 1 condition of oats was 91 per cent of normal, being 93 per cent in northern Illinois, 90 per cent in central Illinois and 89 per cent in southern Illinois.

## BARLEY.

The area reported in barley this year is 100 per cent as compared with last year or 45,000 acres, and the May 1 condition 96 per cent of normal.

## OLD CORN.

The Illinois corn crop of 1915 amounted to 320,111,081 bushels. Of this amount, 24 per cent, or 77,494,271 bushels, is reported in the producers' hands on May 1.

Champaign county produced the largest corn crop of any county in the State in 1915, that of 13,742,800 bushels.

The following table gives the amount of old corn in the producers' hands May 1, the past thirty-seven years, as well as the extent of the crop produced each year:

Year produced.	Crop.	Per cent corn on hand following May 1.	Bushels corn in producers' hands following May 1.
1879.....	305,913,277	32	99,229,889

1914.....	197,710,927	25	48,555,022
1915.....	320,111,081	24	77,494,271
Average.....	235,977,507	29	68,736,124

## MEADOWS.

There is a decrease of 3 per cent in the area of meadows as compared with 1915. Their May 1 condition was 90 per cent of normal in the northern and central divisions of the State and 92 per cent in the southern division.

## PASTURES.

The area devoted to pastures is 99 per cent as compared with 1915, and their May 1 condition is reported as 91 per cent of normal.

### SPRING PLOWING AND PLANTING.

Fifty-six per cent of the spring plowing was reported completed on May 1.

About 54 per cent of the spring planting is usually done by May 1, but this year only 47 per cent of the work is reported finished.

---

### LIVE STOCK.

#### HORSES.

The number of horses reported May 1 is 93 per cent as compared with 1915, and their May 1 condition is 95 per cent of normal.

Distemper is reported from Kane, Knox, Livingston, Marshall, Adams, Brown, Champaign, Christian, DeWitt, Douglas, Fulton, Hancock, Jersey, Logan, Macon, Menard, Montgomery, Piatt, Sangamon, Shelby, Tazewell, Effingham, Monroe, Randolph and Richland counties.

#### MULES.

The number of mules reported May 1 is 97 per cent as compared with last year, and their May 1 condition is 89 per cent of normal.

#### CATTLE.

The number of cattle reported May 1 is 94 per cent as compared with 1915, and their May 1 condition is 95 per cent of normal.

#### DAIRY COWS.

The number of dairy cows is reported as 99 per cent as compared with 1915, and their May 1 condition is 96 per cent of normal.

#### HOGS.

The number of hogs on hand May 1 is reported as 84 per cent as compared with 1915, and their May 1 condition is 95 per cent of normal.

Hog cholera is reported from Cass, Coles, Morgan, Pike, Shelby, Crawford and Wabash counties.

#### SHEEP.

The number of sheep reported is 90 per cent as compared with 1915, and their May 1 condition is 97 per cent of normal.

---

### FRUIT.

In northern and central Illinois the fruit prospect on May 1 was favorable for an average yield of fruit, with the exception of peaches.

In southern Illinois the indications are for a big yield of fruit of all kinds.

---

### WAGES PAID FARM HANDS.

The wages paid farm hands are about the same as last year, but the supply is 10 per cent short of the number required.

## CROP REPORT.

7

The average wages paid farm hands for the past thirty-seven years is given in the following table:

Division	Per day.		Per month.	
	With board.	Without board.	With board.	Without board.
Northern.....	\$1 15	\$1 50	\$22 80	\$31 00
Central.....	95	1 25	20 25	26 85
Southern.....	75	1 00	16 60	22 95
Average.....	\$0 95	\$1 25	\$19 90	\$26 95

The wages paid farm help in the three divisions of the State, during the past thirty-seven years are given in the following tables:

## NORTHERN DIVISION.

Year.	Per day.		Per month.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season and immediately after harvest, when the information as to condition and yield is most needed, to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or 10 per cent, is recorded 110; a decrease of 5 per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

B. M. DAVISON,  
Secretary.

# ILLINOIS CROP REPORT

## Synopsis of the Reports of Assessors

The information contained in this report was obtained from township assessors upon request and mailed to this department the first day of May.

### WINTER WHEAT.

There were 1,812,433 acres seeded to winter wheat last fall. Of this area 52 per cent was reported winter-killed, destroyed by floods or Hessian fly or abandoned, leaving 862,782 acres or 48 per cent of the area sown, for harvest.

The condition of the growing crop on May 1 was 70 per cent of normal in northern Illinois, 58 per cent in central Illinois and 45 per cent in southern Illinois, a State average of 58 per cent.

### SPRING WHEAT.

A decrease of 9 per cent is reported in the area seeded to spring wheat this year, and the May 1 condition is 88 per cent of normal.

### OLD WHEAT.

Of the 35,752,952 bushels of wheat raised in Illinois last year, it is estimated that there was on May 1, 3,438,001 bushels or about 10 per cent in the producers' hands.

The following table gives the amount of old wheat in first hands May 1, since and including 1880:

Year produced.	Crop in bushels.	Per cent crop on hand following May 1.	Amount crop in producers' hands following May 1.	Surplus wheat above seed and consumption at harvest.	Deficit at harvest.

## WINTER RYE.

There were 165,775 acres seeded to winter rye last fall. Twenty-eight per cent of this area was reported winter-killed or otherwise destroyed, leaving 119,451 acres for harvest.

The May 1 condition of this crop was 92 per cent of normal in northern Illinois, 81 per cent in central Illinois and 76 per cent in southern Illinois, a State average of 83 per cent.

## OATS.

There is an increase of 2 per cent in the area seeded to oats this year.

The May 1 condition of the crop in northern Illinois was 92 per cent of normal, in central Illinois 90 per cent and in southern Illinois 85 per cent, a State average of 89 per cent.

## BARLEY.

A decrease of 2 per cent is reported in the area of barley as compared with last year, and its May 1 condition is 94 per cent of normal.

## OLD CORN.

The Illinois corn crop of 1915 amounted to 320,111,081 bushels. Of this amount nearly 23 per cent, or 73,282,908 bushels, is reported in the producers' hands on May 1.

The following table gives the amount of old corn in the producers' hands May 1, the past thirty-seven years, as well as the extent of the crop produced each year:

Year produced.	Crop.	Per cent corn on hand following May 1.	Bushels corn in producers' hands following May 1.

## MEADOWS.

There is a decrease of 2 per cent in the area of meadows as compared with 1915.

Their May 1 condition in northern Illinois is 87 per cent of normal, in central Illinois 91 per cent and in southern Illinois 95 per cent.

## PASTURES.

The area devoted to pastures is 98 per cent as compared with 1915.

The May 1 condition of pastures is 90 per cent of normal in northern Illinois, and 91 per cent in both the central and southern divisions of the State.

## SPRING PLOWING AND SEEDING.

Usually 75 per cent of the spring plowing is completed by May 1. This year 60 per cent of the work was reported finished on that date.

Fifty-three per cent of the spring seeding is usually done by May 1. This year 50 per cent is reported completed on that date.

---

LIVE STOCK.

## HORSES.

The number of horses reported on May 1 is 92 per cent as compared with 1915, and their May 1 condition is 91 per cent of normal.

## MULES.

The number of mules reported May 1 is 93 per cent as compared with last year, and their condition on May 1 was 94 per cent of normal.

## CATTLE.

The number of cattle reported May 1 was 94 per cent as compared with 1915, and their May 1 condition was 92 per cent of normal.

## DAIRY COWS.

The number of dairy cows is reported as 97 per cent as compared with last year, and their condition on May 1 was 92 per cent of normal.

## HOGS.

The number of hogs on hand May 1 is reported as 81 per cent as compared with 1915, and their condition on May 1 is 90 per cent of normal.

## SHEEP.

The number of sheep on May 1 is reported as 90 per cent as compared with last year, and their May 1 condition is 94 per cent of normal.

---

WAGES PAID FARM HANDS.

The wages paid farm hands are about the same as last year, but the supply is 11 per cent short of the demand.

The average wages paid farm hands for the past thirty-seven years is given in the following table:

Division.	Per day.		Per month.	
	With board.	Without board.	With board.	Without board.
Northern.....	\$1 15	\$1 50	\$22 85	\$31 05
Central.....	95	1 25	20 20	26 85
Southern.....	75	1 00	16 60	23 00
Average.....	\$0 95	\$1 25	\$19 90	\$26 95

The wages paid farm help in the three divisions of the State, during the past thirty-seven years are given in the following tables:

# ILLINOIS CROP REPORT

FOR

JUNE 20, 1916

---

## Synopsis of the Reports of Correspondents Upon the Acreage and Yield of Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,  
Springfield, June 20, 1916.

The information contained in this report was obtained from the reports of correspondents mailed to this office the twentieth of June.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-nine years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred and fifty-seven, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### CORN.

An increase of 1 per cent is reported in the area planted to corn for the 1916 crop.

The June 20 condition of corn is 85 per cent of normal being 81 per cent in northern Illinois, 86 per cent in central Illinois and 88 per cent in southern Illinois.

Corn has not made the usual growth owing to the cold wet weather. Frequent rains delayed farm work and corn is in need of cultivation.

Corn is about ten days late, the earliest appearance above ground being reported as April 8th. Most of the corn appeared between the 10th and 20th of May.

Cut, wire and grub worms and root lice have injured corn in many counties of the State.

The quality of seed corn is reported as 93 per cent of normal.

### BROOM CORN.

The area of broom corn is 94 per cent as compared with 1915 and the June 20 condition is 89 per cent of normal.

### SORGHUM.

The area of sorghum is 95 per cent as compared with last year and its condition on June 20 is 90 per cent of normal.

### WINTER WHEAT.

The June 20 condition of winter wheat in northern Illinois is 83 per cent of normal, in central Illinois 62 per cent and in southern Illinois 48 per cent, a State

average of 64 per cent, which is 26 points less than the June 20 condition of a year ago.

Hessian fly is reported from many counties in the central and southern divisions of the State.

#### SPRING WHEAT.

A decrease of 3 per cent is reported in the area of spring wheat this year in the northern division of the State and its June 20 condition is 93 per cent of normal.

But very little spring wheat is raised in the central and southern divisions of the State.

#### OATS.

The condition of oats on June 20 is reported as 2 points better than on May 1, being 93 per cent of normal. In northern Illinois the condition of oats is 97 per cent of normal, in central Illinois 92 per cent and in southern Illinois 91 per cent.

#### RYE.

The June 20 condition of rye in northern Illinois is 94 per cent of normal, in central Illinois 88 per cent and in southern Illinois 77 per cent, a State average of 87 per cent.

#### BARLEY.

The condition of barley on June 20 is 97 per cent in northern Illinois, 92 per cent in central Illinois and 85 per cent in the southern division of the State.

#### MEADOWS.

The condition of meadows on June 20 is 94 per cent of normal, being 103 per cent in northern Illinois, 94 per cent in central Illinois and 87 per cent in the southern division of the State.

#### CLOVER.

There is a decrease of 3 per cent reported in the area of clover.

Northern Illinois reports the June 20 condition of clover as 98 per cent of normal, central Illinois 94 per cent and southern Illinois 91 per cent, a State average of 94 per cent.

#### ALFALFA.

There is a decrease of 4 per cent in the area of alfalfa as compared with 1915 and its June 20 condition is 93 per cent of normal, being 95 per cent in northern and southern Illinois and 89 per cent in central Illinois.

#### HUNGARIAN AND MILLET.

The condition of this crop on June 20 in northern Illinois is 98 per cent of normal, in central Illinois 105 per cent and in southern Illinois 92 per cent.

#### PASTURES.

Pastures were never in a better condition on June 20 than this year when their condition is reported as 103 per cent of normal, being 105 per cent in northern Illinois, 104 per cent in central Illinois and 101 per cent in southern Illinois.

#### IRISH POTATOES.

The area of Irish potatoes is reported as 100 per cent as compared with 1915 and their June 20 condition is 97 per cent of normal.

#### SWEET POTATOES.

There is a decrease of 4 per cent in the area of sweet potatoes as compared with last year and their June 20 condition is 94 per cent of normal.

#### FIELD BEANS.

The area of field beans is 100 per cent as compared with 1915 and their condition on June 20 is 96 per cent of normal.

## COW PEAS.

The area of cow peas is 125 per cent as compared with 1915 in northern Illinois, 94 per cent in central Illinois and 92 per cent in the southern division of the State.

## TOBACCO.

But very little tobacco is raised in Illinois outside of the southern division of the State where the area is reported the same as last year and the condition as 87 per cent of normal on June 20.

---

FRUIT.

Apples, peaches and cherries are reported a short crop in northern and central Illinois, but in the southern division of the State a fair yield is indicated.

All small fruits and berries are reported plentiful.

## CHERRIES.

In northern Illinois the yield of cherries was 31 per cent of an average, in central Illinois 57 per cent and in southern Illinois 85 per cent.

## STRAWBERRIES.

The yield of strawberries in northern Illinois was 93 per cent of a seasonable average, 104 per cent in central Illinois and 100 per cent in the southern division of the State.

## RASPBERRIES.

The yield of raspberries was 92 per cent of an average yield in northern Illinois, 93 per cent in central Illinois and 94 per cent in the southern division of the State.

## GOOSEBERRIES.

In northern Illinois the yield of gooseberries was 81 per cent of an average and 84 per cent in both the central and southern divisions of the State.

## CURRANTS.

In northern Illinois the yield of currants was 74 per cent of an average, in central Illinois 83 per cent and in southern Illinois 87 per cent.

## VINEYARDS.

The area of vineyards as compared with 1915 is 92 per cent in northern Illinois, 97 per cent in central Illinois and 98 per cent in the southern division of the State.

The June 20 condition of vineyards is reported as 90 per cent of normal.

---

YOUNG LIVE STOCK.

## PIGS.

The number of pigs reported this year is 90 per cent as compared with 1915 and their June 20 condition is 97 per cent of normal in northern Illinois and 98 per cent in both the central and southern divisions of the State.

## LAMBS.

The number of lambs is 90 per cent as compared with last year and their June 20 condition is 97 per cent of normal.

## CALVES.

The number of calves reported this year as compared with 1915 is 97 per cent in both the northern and southern divisions of the State and 99 per cent in central Illinois. Their June 20 condition is 99 per cent of normal.

## COLTS.

The number of colts foaled this year is 93 per cent as compared with last year and their June 20 condition is 98 per cent of normal.

The average value of colts at weaning time is reported as \$51 in northern Illinois, \$56 in central Illinois and \$54 in southern Illinois.

The number of colts lost prior to weaning is reported at 12 per cent in northern Illinois and 8 per cent in both the central and southern divisions of the State.

The average cost of service of stallions in northern Illinois is reported as \$16, in central Illinois \$14 and in southern Illinois \$11.

## WOOL.

The wool clip of 1916 was 98 per cent as compared with 1915 in northern Illinois, 94 per cent in central Illinois and 90 per cent in the southern division of the State.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season and immediately after harvest, when the information as to condition and yield is most needed, to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or 10 per cent, is recorded 110; a decrease of 5 per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

B. M. DAVISON,  
Secretary.

# ILLINOIS CROP REPORT

FOR

AUGUST 1, 1916

---

## Synopsis of the Reports of Correspondents Upon the Acreage and Yield of Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, August 1, 1916.

The information contained in this report was obtained from the reports of correspondents mailed to this office the first of August.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

The reports of our correspondents as to acreage of the crops, after being carefully edited in this Department, were used as a basis for applying the estimates as to the growing condition or yield of the harvested crop.

The correspondents number three hundred and fifty-seven and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### WHEAT.

Of the area seeded to wheat in the fall of 1915, 1,818,115 acres, about 59 per cent or 1,079,568 acres were harvested in 1916.

In northern Illinois, 40 per cent of the area seeded was reported winter killed, destroyed by floods or Hessian fly or abandoned and in both the central and southern divisions of the State 41 per cent.

The yield of winter wheat is reported as 17 bushels per acre in Northern Illinois, 12 bushels in Central Illinois and 6 bushels in Southern Illinois, a State average of 10 bushels, which is the lightest yield reported since 1912.

The total yield amounted to 10,378,581 bushels and at the ruling price of \$1.14 per bushel on August 1st, the total value of the crop amounted to \$11,801,016.

The following table gives the area, yield and value of the wheat crop of the State during the past fifty-six years.

## WHEAT (SPRING AND WINTER).

Year.	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## WHEAT CONSUMPTION.

In estimating the amount of wheat required in the State for seed and bread, it is necessary to consider the entire area seeded, instead of that harvested, as the amount required for seed is based on the area seeded last year which was 1,854,914 acres. As one and one-third bushels per acre is used for seed, it will require 2,473,216 bushels to seed next year's crop.

Allowing four bushels per capita for food, it takes, according to the 1910 census, which gives Illinois 5,638,591 inhabitants, 22,554,364 bushels for that purpose; so that 25,027,580 bushels will be required for home use (seed and consumption).

As the total yield amounted to only 11,057,044 bushels it will be necessary to import 13,970,536 bushels or equivalent in flour to fill the demand of the home market in Illinois.

## OATS.

The area seeded to oats for the 1916 crop is reported as 5,012,440 acres.

The average yield of oats was 41 bushels in northern Illinois, 36 bushels in central Illinois and 25 bushels in southern Illinois, a State average of 36 bushels.

The total yield amounted to 180,070,000 bushels and as the ruling price of oats on August 1 was 36 cents per bushel the total value of the crop amounted to \$65,502,874.

Oats weighed light as it was too hot to fill well, maturing too rapidly.

Rust is reported from Henderson, Iroquois, Stephenson, Warren, Brown, Fulton, Macoupin, Shelby and Pulaski counties.

The following table gives the area, yield and value of the oats crop of the State during the past fifty-six years:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of the oats crop in each county in the State this year.

## CROP REPORT.

## WINTER RYE.

There are 139,624 acres of winter rye reported this year. The average yield per acre was 14 bushels and the total yield amounted to 2,011,036 bushels.

The average price on August 1 was 89 cents per bushel and the total value of the crop amounted to \$1,790,936.

The following table gives the area, yield and value of the past fifty-six rye crops grown in the State.

Year.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of rye in each county in the State.\*

## CROP REPORT.

7

## BARLEY.

There are 47,292 acres of barley reported this year. The average yield per acre was 28 bushels and the total yield amounted to 1,336,040 bushels.

The ruling price on August 1st was .63 cents per bushel and the total value of the crop amounted to \$844,468.

The following table gives the area, yield and value of the last fifty-six barley crops produced in the State:

Year.	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860...	45,058	23	1,036,334	\$0 49	\$ 507,803	\$11 26	\$10 55	\$ 475,362	\$ 32,441

In a table published elsewhere in this report will be found the area, yield and value of the barley crop in the State by counties.

## HAY.

The area devoted to meadows is reported as 4,272,613 acres and the average yield per acre as 1½ tons.

The total yield amounted to 6,340,232 tons. The average price per ton on August 1 was \$9.90 and the total value of the crop amounted to \$62,857,189.

The August 1 condition of clover is 97 per cent of normal and the average yield 1 2-3 tons per acre.

The yield of alfalfa was 2 2-3 tons per acre in northern Illinois, in central Illinois 2 tons and in southern Illinois 2½ tons.

The following table gives the area, yield and value of the last fifty-six hay crops produced in this State:

*Year.	Number of acres harvested.	Average yield per acre—tons.	Tons produced.	Price per ton.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## CORN.

There were 9,022,079 acres planted to corn for the crop of 1916, northern Illinois reporting 3,611,973 acres, central Illinois 3,991,826 acres and southern Illinois 1,418,280 acres.

The condition of corn on August 1, was 76 per cent of normal, which is a deterioration of 9 points since the June 20 report.

Corn was planted late and made slow growth during the cool wet weather of May and June, and was not in condition to withstand the extreme heat and drought of July. Corn is tasseling out and needs rain.

Corn is reported as "firing" in Peoria, Putnam, Stark, Warren, Woodford, Adams, DeWitt, Fulton, Greene, Hancock, Macon, Macoupin, Morgan, Pike, Tazewell, Franklin, Monroe, and Pope counties.

## BROOM-CORN.

The condition of broom-corn on August 1 was 90 per cent of normal in northern Illinois, 79 per cent in central Illinois and 83 per cent in the southern division of the State.

## SORGHUM.

The condition of sorghum in both northern and central divisions was 77 per cent of normal and 83 per cent in the southern division of the State.

## PASTURES.

The area devoted to pasture is 7,123,961 acres. From nearly every county in the State pastures were reported in need of rain on August 1, their condition on that date being but 77 per cent of normal, which is a decrease of 26 points since the June 20 report and 24 points less than their condition on August 1 of last year.

## IRISH POTATOES.

The August 1 condition of Irish potatoes was 72 per cent of normal in northern Illinois, 77 per cent in central Illinois and 89 per cent in southern Illinois; a State average of 79 per cent, which is 22 points less than their August 1 condition of a year ago.

## SWEET POTATOES.

The condition of sweet potatoes on August 1 was 81 per cent of normal, being 81 per cent in northern Illinois, 77 per cent in central Illinois and 86 per cent in the southern division of the State.

## BUCKWHEAT.

The area of this crop is reported as 97 per cent as compared with 1915 and its August 1 condition was 91 per cent of normal.

## TURNIPS AND OTHER ROOT CROPS.

The area of turnips and other root crops is 89 per cent as compared with 1915 and their August 1 condition was 81 per cent of normal.

## CASTOR BEANS.

No reports were received on castor beans from northern or central Illinois. Southern Illinois reports their August 1 condition as 90 per cent of normal.

## TOBACCO.

No reports were received from the northern or central divisions of the State on the condition of the tobacco crop, but in the southern division its August 1 condition is 90 per cent of normal.

## COW PEAS.

The August 1 condition of cow peas was 89 per cent of normal in northern Illinois, 77 per cent in central Illinois and 83 per cent in the southern division of the State.

## FIELD BEANS.

The August 1 condition of field beans was 85 per cent of normal in northern Illinois, 84 per cent in central Illinois and 82 per cent in the southern division of the State.

---

## FRUIT.

Fruit will be a short crop in Illinois this year, with the exception of grapes.

## APPLES.

The condition of apples in northern Illinois on August 1 was 38 per cent of normal, in central Illinois 47 per cent and in southern Illinois 61 per cent; a State average of 49 per cent.

## PEACHES.

The condition of peaches on August 1 was 19 per cent of normal in northern Illinois, 41 per cent in central Illinois and 66 per cent in the southern division; a State average of 42 per cent.

## PEARS.

The August 1 condition of pears was 50 per cent of normal, being 44 per cent in northern Illinois, 43 per cent in central Illinois and 63 per cent in the southern division of the State.

## PLUMS.

The condition of plums on August 1 was 54 per cent of normal, being 33 per cent in northern Illinois, 48 per cent in central Illinois and 80 per cent in the southern division of the State.

## GRAPES.

The condition of grapes on August 1 in northern Illinois was 62 per cent of normal, in central Illinois 79 per cent and in southern Illinois, 91 per cent; a State average of 77 per cent.

## BLACKBERRIES.

The blackberry crop of 1916 was 78 per cent of an average yield, being 67 per cent in northern Illinois, 64 per cent in central Illinois and 103 per cent in the southern division of the State.

## QUINCES.

The condition of quinces in northern Illinois on August 1 was 72 per cent of normal, in central Illinois 60 per cent and in southern Illinois 70 per cent; a State average of 67 per cent.

---

## LIVE STOCK.

Farm animals are reported generally healthy, though many horses died as a result of the extreme heat. Horses and cattle are reported thin on account of shortage of pasture.

---

## DRAIN TILE.

The number of feet of drain tile reported laid in the State amounts to 757,585,015 feet which gives an average of 25 feet to each acre of cultivated land in Illinois.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season and immediately after harvest, when the information, as to condition and yield is most needed, to enable the producer and the public to decide as to the extent of the supply and the

market value of the crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or 10 per cent, is recorded 110; a decrease of 5 per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

B. M. DAVISON,  
Secretary.

## WINTER WHEAT.

NORTHERN DIVISION.	Area seeded 1915.	Per cent area winter-killed or otherwise destroyed or abandoned.	Area left for harvest.	Yield per acre in bushels.	Total yield in bushels.	Price per bushel.	*Value of crop August 1, 1916.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

# ILLINOIS CROP REPORT

FOR

DECEMBER 1, 1916

## Synopsis of the Reports of Correspondents Upon the Acreage and Yield of Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, December 1, 1916.

The information contained in this report was obtained from the reports of correspondents mailed to this office the first of December.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

The reports of our correspondents as to acreage of the crops, after being carefully edited in this Department, were used as a basis for applying the estimates as to the growing condition or yield of the harvested crop.

The data in regard to yield per acre, price of crops and value of crops and live stock was obtained from crop correspondents, who number over three hundred and represent every section of the State.

A large number of the correspondents have been reporting to this Department for the past thirty-nine years, and their estimates, for a term of years, when compared with subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### WINTER GRAIN.

#### WHEAT.

The area reported seeded to winter wheat for the 1917 crop was 1,742,982 acres. Northern Illinois reported 159,559 acres, an increase in area of 12 per cent, central Illinois 821,572 acres, an increase of 4 per cent, and southern Illinois 761,851 acres, a decrease of 14 per cent. Dry weather at seeding time is given as the cause of this decrease in area in southern Illinois.

The condition of winter wheat on December 1 was 93 per cent of normal, being 97 per cent in northern Illinois, 93 per cent in central Illinois and 88 per cent in the southern division of the State.

Hessian fly appeared in early sown wheat in Adams, Christian, Hancock, Jersey, Mason, Moultrie, Scott, Clay, Crawford, Edwards, Franklin, Gallatin, Jefferson, Lawrence, Massac, Monroe, Pope, Washington, White and Williamson counties.

#### RYE.

The area seeded to rye for the 1917 crop is reported as 137,654 acres, 38,576 acres being reported from northern Illinois, 54,965 acres from central Illinois and 44,113 acres from southern Illinois.

The condition of this crop on December 1 was 99 per cent of normal in northern Illinois, 95 per cent in central Illinois and 89 per cent in southern Illinois, a State average of 95 per cent.

## CORN.

There were 9,055,614 acres planted to corn for the crop of 1916.

Drought and intense heat of July cut short the yield of corn, the average yield being but 27 bushels per acre, and the total yield amounted to 241,023,799 bushels.

Northern Illinois reports the yield as 28 bushels per acre, central Illinois 27 bushels and southern Illinois 22 bushels.

The price of corn on December 1 was 87 cents per bushel in northern Illinois, and 83 cents in central and southern Illinois, a State average of 85 cents, which is the highest price recorded on December 1, since reports have been issued by this department, viz., 1860. In 1864 an average price of 75 cents per bushel on December 1, was recorded. The total value of the 1916 corn crop of the State is estimated at \$204,113,293.

The quality of the grain was 87 per cent of normal, being 90 per cent in northern Illinois, 87 per cent in central Illinois and 83 per cent in the southern division of the State.

## CROP REPORT.

5

The area, yield and value of the corn crop of the State for the past fifty-seven years is given in the following table:

Year.	Number of acres.	Average yield per acre.	Bushels Produced.	Price per bushel—cents.	Total value.	Value Per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860...	3,839,159	30	115,174,770	42½	\$ 48,944,277	\$12 74	\$10 50	\$40,311,169	\$ 8,633,108	.....

## BROOM-CORN.

The area of broom-corn was reported as 20,054 acres. The total yield amounted to 13,614,000 pounds, an average yield of 667 pounds.

The ruling price December 1 was \$179 per ton and the total value of the crop amounted to \$1,219,550.

The following table gives the area, yield and value of the broom-corn crop of Illinois since 1876:

Year.	Acreage.	Av. yield per acre— pounds.	Total yield— pounds.	Price per ton.	Value of crop.
1877.....	14,566	458	6,674,747	\$ 71 20	\$ 237,594

## CROP REPORT.

7

## SORGHUM.

There were 24,208 acres of sorghum reported in 1916. The average yield per acre was 87 gallons and the total yield amounted to 2,117,285 gallons.

The ruling price on December 1 was 65 cents per gallon, the total value of the product amounting to \$1,406,666.

The following table gives the area, yield and value of the sorghum crops produced in the State since 1876:

Year.	Acreage.	Av. yield per acre— gallons.	Total number of gallons.	Price per gallon.	Value of crop.
1877	19,335	63	1,237,164	\$0 42	\$515,409

## BUCKWHEAT.

The area of buckwheat is reported as 3,865 acres.

The average yield per acre was 13 bushels and the total yield amounted to 50,746 bushels.

The total value of the crop amounted to \$66,142, an average price of \$1.30 per bushel.

The following table gives the area, yield and value of the buckwheat crop in this State for the past forty years:

Year.	Acreage.	Av. yield per acre— bushels.	Total number of bushels.	Price per bushel.	Value of crop.
1877.....	15,880	13	207,693	\$0 73	\$151,612

## TIMOTHY SEED.

There were 135,601 bushels of timothy seed reported produced in 1916.

At the average price per bushel of \$2.60, the total value of the crop amounted to \$351,589.

The following table gives the amount and value of the crop in this State since and including 1877:

Year.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	483,571	\$1 25	\$ 504,464
1878.....	261,559	1 25	326,949

## CROP REPORT.

## CLOVER SEED.

There were 89,732 bushels of clover seed reported produced in 1916.

The average price per bushel was \$9.75 and the total value of the crop amounted to \$874,560.

In the following table will be found the yield and value of the crop of clover seed for 1916, as compared with the thirty-nine years preceding:

Year.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	64,686	\$ 4 80	\$310,493
1878.....	77,388	4 05	313,421

## HUNGARIAN AND MILLET SEED.

There were 23,378 bushels of Hungarian and millet seed reported produced in 1916.

The total value of the crop amounted to \$25,498, an average price of \$1.10 per bushel.

The following table gives the yield and value of this crop since 1876:

Year.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	17,463	\$0 65	\$10,701

## ALFALFA.

The area devoted to this crop is reported as 51,945 acres in northern Illinois, 26,450 acres in central Illinois and 25,600 acres in southern Illinois, a total area of 103,995 acres.

The price of alfalfa is reported as \$14.80 in northern Illinois, \$13.50 in central Illinois and \$13.25 in the southern division of the State.

## BEANS.

There were 11,757 acres of beans reported in 1916. The average yield was 14 bushels per acre and the total yield amounted to 162,291 bushels.

The ruling price December 1 was \$6.30 per bushel and the total value of the crop amounted to \$1,025,006.

The following table gives the area, yield and value of the 1916 crop of beans, together with those of thirty-nine years preceding:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	1,545	13	19,955	\$1 50	\$ 29,916

## CASTOR BEANS.

There were 968 acres reported in castor beans in 1916 and the average yield 14 bushels per acre, making the total yield 13,455 bushels.

The ruling price December 1 was \$1.90 per bushel and the total value of the crop amounted to \$25,500.

In the following table is given the area, yield and value of this crop since 1877:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	4,503	3½	17,538	\$1 10	\$ 18,512

## TOBACCO.

The area devoted to tobacco in 1916 was reported as 709 acres. The average yield per acre was 700 pounds and the total yield amounted to 496,300 pounds.

The total value of the crop at the ruling price of 11 cents per pound on December 1 was \$52,943.

The following table gives the area, yield and value of the crop in this State since 1876:

Year.	Acreage.	Av. yield per acre— pounds	Total number of pounds.	Price per pound.	Value of crop.
1877.....	12,230	640	7,885,586	\$0 08	\$638,848

## PASTURES.

The area devoted to pastures in 1916 was 7,133,472 acres.

The average value per acre for the season of 1916 was \$5.10 and the total value amounted to \$36,414,431.

The following table gives the area and value of pastures for forty years:

Year.	Acreage.	Average value per acre for season.	Value of crop.
1877.....	4,367,603	\$3 38	\$14,764,112

## IRISH POTATOES.

The area devoted to Irish potatoes in 1916 was reported as 116,980 acres. The average yield was but 50 bushels per acre and the total yield amounted to 5,905,306 bushels, which is a decrease of over 8,000,000 bushels from the 1915 yield. The average price per bushel on December 1 was \$1.85, the highest price recorded since reports have been issued by this department. Sixty cents per bushel was the average price obtained on December 1, 1915, and seventy cents a ten year average. The total value of the crop was \$10,885,739.

The following table gives the area, yield and value of the Irish potato crops of the State since 1859:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## SWEET POTATOES.

The area reported in sweet potatoes in 1916 was 12,872 acres.

The total yield amounted to 1,271,587 bushels, an average of 99 bushels per acre.

The average price per bushel was \$1.25 and the total value of the crop amounted to \$1,600,869.

The following table gives the area, yield and value of the sweet potato crop of the State for the past forty years:

Year.	Acreage.	Av. yield per acre in bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877	2,355	63	148,270	\$0 85	\$126,092

## TURNIPS AND OTHER ROOT CROPS.

There were 1,756 acres reported in turnips and other root crops, and the total value of the crops amounted to \$184,512.

The average yield of turnips was 94 bushels per acre.

The following table gives the acreage and value of turnips and other root crops grown in the State during the past forty years:

Year.	Acreage.	Value per acre.	Value of crop.
1877.....	7,056	\$ 39 55	\$279,136

## FRUIT.

## APPLES.

The apple crop of 1916 was but one-third of an average yield and the price obtained for winter apples on December 1 was reported as \$1.30 per bushel.

## PEACHES.

The yield of peaches was but 40 per cent of an average yield and the price obtained was \$1.50 per bushel.

## PEARS.

The yield of pears in 1916 was 61 per cent as compared with 1915. The average price of pears in their season was \$1.15 per bushel.

## GRAPES.

There were 311,872 pounds of grapes reported produced in 1916. The total value of the crop amounted to \$7,952, an average price of 3 cents per pound.

The following table gives particulars concerning the grape crop of the State for the past forty years:

Year.	Pounds produced.	Price per pound	Value of crop.
1877.....	3,002,748	\$0 03	\$ 92,782

## STRAWBERRIES.

The value of the strawberry crop of 1916 is reported as \$134,694, of which \$38,350 is reported from northern Illinois, \$19,025 from central Illinois and \$77,319 from southern Illinois.

## WATERMELONS.

Northern Illinois reports the value of watermelons sold in 1916 as \$5,787, central Illinois \$24,660 and southern Illinois \$22,787, a total value of \$53,234.

## OTHER FRUITS AND BERRIES.

The value of other fruits and berries sold in 1916 amounted to \$15,088, of which \$6,245 was reported from northern Illinois, \$3,011 from central Illinois and \$5,832 from southern Illinois.

## OTHER CROPS NOT NAMED.

There are a number of crops raised in this State in certain localities but are not of sufficient importance to be tabulated alone. The value of these miscellaneous crops for 1916 amounted to \$153,034.

## BEES AND HONEY.

There were 663,022 pounds of honey produced in Illinois in 1916. The average price obtained was 17 cents per pound, making the total value \$110,274.

The number of hives of bees reported in 1916 was 49,033.

The following table gives the amount and value produced in this State during the past twenty-six years, together with the number of hives of bees:

Year.	Pounds produced.	Price per pound.	Value of product.	Number of hives of bees.
1891.....	821,678	\$0 14	\$112,934	120,252

## LIVE STOCK.

## HOGS.

The number of hogs in the State May 1, 1916 is reported as 2,104,571. At the equalized value of \$2.61 per head, they were worth \$5,492,930.

The number marketed was 1,746,821 or 83 per cent of the whole number. The average weight of those marketed was 199 pounds, giving a total gross weight of 348,034,186 pounds.

The average price per cwt. of hogs marketed was \$8.80 and their value at this price amounted to \$30,560,147.

But few outbreaks of hog cholera are reported.

The following table gives the number of hogs assessed and marketed in 1916, as well as their weight and value, for the past sixty-one years:

Year.	Assessors' returns.		Estimated per cent marketed.	Number fat hogs marketed.	Average gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value hogs marketed.

## BEEF CATTLE.

The number of cattle in the State May 1, 1916 is reported as 1,246,213. At the equalized value of \$10.41 per head, they were worth \$12,973,077.

Twenty-three per cent of the whole, 286,624 were marketed during the year. The average weight was 1,032 pounds, making the total weight 295,891,824 pounds.

## CROP REPORT.

23

The average price of those sold prior to December 1 was \$7.85, a total value of \$23,217,492.

The supply of beef cattle on hand December 1, 1916 was 85 per cent and the average price per cwt. on that date was \$7.95.

Cornstalk disease affected cattle in several counties of the State.

The following table gives the number, weight and value of the cattle marketed in the State since 1855:

Year.	Assessors' returns.		Estimated per cent marketed.	Number beef cattle marketed.	Average gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value beef cattle marketed.
	Number.	Value.

## SHEEP.

There were 252,543 sheep reported this year. At the equalized value of \$1.35 per head, they were worth \$340,933.

Twenty-two per cent of the whole or 55,558, were marketed. Their total gross weight was 5,914,842 pounds, an average weight of 106 pounds.

The average price received for those marketed prior to December 1, was \$7.55, making the total value \$446,370. The supply of sheep on hand December 1 was 86 per cent and the average price per cwt. on that date \$7.80.

The following table gives the number, weight and value of the sheep marketed in the State since 1855:

Year.	Assessors' returns.		Estimated per cent marketed.	Number fat sheep marketed.	Average gross weight per head.	Total gross weight.	Value per 100 pounds gross.	Total value sheep marketed.
	Number.	Value.

## CREAM.

There were 3,063,400 gallons of cream reported sold in the State in 1916.

At the average price of \$1.05 per gallon, the total value amounted to \$3,196,625.

The quantity and value of the cream sold in the State since 1877 is given in the following table:

Year.	Gallons sold.	Price per gallon.	Total value.
1877.....	2,744,259	\$0 55	\$1,509,342

## BUTTER.

There were 8,426,673 pounds of butter reported sold in the State in 1916.

The total value amounted to \$3,096,514, an average price of 37 cents per pound.

In the following table will be found the quantity and value of the butter sold in Illinois during the past thirty-nine years:

Year.	Pounds sold.	Price per pound.	Total value.
1877.....	18,970,227	\$0 20	\$3,794,045
1878.....	17,997,652	15	2,699,648

1915.....	582,946	19	108,475
1916.....	511,401	26	135,454

Tables published elsewhere in this report give by counties the quantity and value of the dairy products of the State for 1916.

## POULTRY AND EGGS.

The value of the poultry sold in 1916 amounted to \$2,755,537, of which \$1,082,677 was reported from northern Illinois, \$988,586 from central Illinois and \$684,274 from southern Illinois.

The value of eggs sold in northern Illinois in 1916 is reported as \$1,445,345, in central Illinois \$1,044,423 and in southern Illinois \$1,485,152, a total value of \$3,974,920.

## SUMMARY.

The following table gives the value of the principal farm products and live stock of Illinois for the year 1916:

Corn .....	\$204,113.293
Winter wheat .....	11,801,016
Spring wheat .....	711,658
Oats .....	65,502.874
Rye .....	1,790,926
Barley .....	844,468
Buckwheat .....	66,142
Hay .....	62,857,189
Timothy seed .....	351,589
Clover seed .....	874,560
Hungarian and millet seed.....	25,498
Irish potatoes .....	10,885,739
Sweet potatoes .....	1,600,869
Turnips and other root crops.....	184,512
Broom-corn .....	1,219,550
Sorghum .....	1,406,666
Beans .....	1,025,006
Castor beans .....	25,500
Tobacco .....	52,943
Other crops not named.....	153,034
Grapes .....	7,952
Strawberries .....	134,694
Watermelons .....	53,234
Other fruits and berries.....	15,088
Wine .....	53,031
Honey .....	110,274
*Horses (equalized value) .....	30,654.337
*Beef cattle (equalized value) .....	12,973,077
Dairy cows .....	46,965,308
*Hogs (equalized value) .....	5,492,930
*Sheep (equalized value) .....	340,933
Wool .....	293,472
Milk sold .....	20,431,581
Cream sold .....	3,196,625
Butter sold .....	3,096,514
Cheese sold .....	135,454
Poultry sold .....	2,755,537
Eggs sold .....	3,974,920
Total .....	\$496,178,003

\*NOTE.—The equalized value as fixed by the State Board of Equalization represents but one-fifth of the actual value.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season and immediately after harvest, when the information as to condition and yield is most needed, to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or 10 per cent, is recorded 110; a decrease of 5 per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

B. M. DAVISON, Secretary.

NAMES AND POSTOFFICE ADDRESSES  
OF  
**CROP CORRESPONDENTS**  
STATE BOARD OF AGRICULTURE  
FOR THE YEAR 1916  
WITH DATE OF APPOINTMENT

**ADAMS COUNTY—**

- 1883. H. C. Cupp, Payson.
- 1888. C. H. Rankin, Payson.
- 1904. A. R. Wallace, Jr., Camp Point.
- 1913. G. C. Dean, R. F. D., Adams.

**ALEXANDER COUNTY—**

- 1907. G. W. Childress, Olive Branch.
- 1909. Herman Bunch, McClure.

**BOND COUNTY—**

- 1885. W. H. Taylor, Greenville.

**BOONE COUNTY—**

- 1909. Phil H. Sanford, Garden Prairie.
- 1915. Jay S. Bennett, Belvidere, R. F. D. No. 1.

**BROWN COUNTY—**

- 1909. E. F. Byrns, Mt. Sterling, R. F. D.
- 1909. C. J. Davis, Timewell.
- 1909. J. M. Cronin, Mt. Sterling, R. F. D.

**BUREAU COUNTY—**

- 1907. E. B. Anthony, Tiskilwa.
- 1915. E. Oliver Paulson, Ohio.

**CALHOUN COUNTY—**

- 1909. Wm. Franks, Batchtown.

**CARROLL COUNTY—**

- 1909. Wm. H. Phillips, Mt. Carroll.
- 1909. Geo. Lang, Chadwick.
- 1915. Glen G. Miller, Savanna.

**CASS COUNTY—**

- 1903. M. L. Crum, Virginia.
- 1915. Frank H. Trussell, Bluff Sp'gs.
- 1915. Lester Edwards, Ashland.

**CHAMPAIGN COUNTY—**

- 1908. Dr. F. M. Conkey, Homer.
- 1907. R. E. Chambers, Sadorus.
- 1907. Reuben Roughton, Rantoul.
- 1916. W. A. Cooley, Broadlands.

**CHRISTIAN COUNTY—**

- 1878. O. S. Nash, Sharpsburg.
- 1904. J. Earl White, Morrisonville.
- 1908. C. W. Ebert, Owaneco.
- 1909. E. Dixon, Pana.

**CLARK COUNTY—**

- 1880. Jerry Ishler, Martinsville.
- 1909. T. W. Richards, West York.
- 1915. Chester E. English, Marshall.
- 1915. Clarence F. Hawker, Marshall.

**CLAY COUNTY—**

- 1904. Leslie F. Brissenden, Flora.
- 1904. Jno. T. Campbell, Louisville.
- 1916. Ercil Tolliver, Louisville.

**CLINTON COUNTY—**

- 1909. Jos. Heimann, Albers.
- 1901. Frank Bassler, Trenton.

**COLES COUNTY—**

- 1905. John W. Black, Humboldt.
- 1905. James A. Walker, Lerna.
- 1905. E. E. Boyer, Ashmore.
- 1909. Sam Rardin, Rardin.

**COOK COUNTY—**

- 1907. John T. Cooper, Orland.
- 1915. D. F. Tegtmeier, Arlington Heights, P. O. Box 209.

**CRAWFORD COUNTY—**

- 1897. W. P. Hart, Annapolis.
- 1900. Clinton Newlin, Hutsonville.

**CUMBERLAND COUNTY—**

- 1882. James M. Albin, Neoga.
- 1897. J. L. Mattoon, Greenup.

**DEKALB COUNTY—**

- 1913. Bert A. Bark, Sandwich.
- 1914. Alvin Warren, Leland.

**DE WITT COUNTY—**

- 1897. C. E. Robb, Clinton.
- 1912. J. T. Sprague, Clinton.
- 1915. A. H. Smith, Clinton.
- 1916. S. Miller, Weldon.

**DOUGLAS COUNTY—**

- 1887. William Iles, R. F. D. No. 6, Tuscola.
- 1892. Perry N. Howe, R. F. D. No. 3, Tuscola.
- 1909. W. F. Goodspeed, Tuscola.
- 1910. John McCarty, Arcola, R. F. D. No. 5.
